## PRETTY PLAITS

Go from corporate chic to evening glamour with Amanda's grown-up side plait. Feeling a little adventurous? Mix it up with a flirty fishtail plait.

"To get Amanda's whimsical look, start by tonging the hair or using a straightening iron to give it some curl," advises Remington. "Section hair to one side and pull it all together to start a plait in your mid-lengths. Make sure you leave the end out of the plait. Then ruche the braid apart so it looks loose, and finish with hairspray for extra hold."
