Travel Essentials: Euro Summer Getaway

May 29, 2018 | Jason

Are you packing for your next overseas trip? I'm currently travelling around Europe for six weeks and found it a little difficult to pack for this trip due to the amount of time I'm away. Here are the essentials I packed for my recent trip to Europe ensuring I still had my luxuries while saving on valuable travel space and weight.

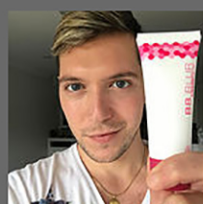

Parlux Advance Light Ionic & Ceramic Hairdryer

Looking my best from head to toe applies while I'm on holiday - are you with me? I'm very particular about my hair and the hair dryer I use. I'm a massive fan of Parlux products, however; being professional hairdryers, they aren't built for travel...until now. Parlux has released the Advance Light Ionic & Ceramic hair dryer which weighs in at 460g and delivers the same salon-quality results as its professional siblings. The advance light is also quieter than its predecessors, features ionic & ceramic technology for healthy and static free hair, and it dries super-fast making it more energy efficient. The hairdryer is available in a range of fun colours to match your style making it the must-have accessory for hair enthusiasts. [Parlux Advance Light Ceramic & Ionic Hair Dryer](#) AUD 259 AUD.
